

Installing/Updating R and RStudio

The goal of this workshop is to equip participants with the ability to recognize and produce Manipulated data & visualizations in accordance with the best practices of the field. Looking forward to meeting you all!

Before the Workshop

Please install R, RStudio, and the `ggplot2` library following these [installation instructions](#). If you have any trouble installing I will be in the venue 30 min before the session where you can come for assistance. Installation might take 15 minutes or more even on a good internet connection, so please install ahead of time!

Note

- All software used in this workshop is free.

After the Workshop

Fill out the online post-workshop questionnaire that will be provided after the session.
